"Learn to let the painting process blend just enough structure with chance to allow for unique, attention-getting and expressive results. Combine fun, energetic and intuitive beginnings into explorations and solutions to discover your own strengths. You can move more quickly and consistently to stronger paintings. Daily demonstrations and challenge projects will guide you to claim that elusive "next" level no matter where you start. You will start building confidence through learning to simplify your compositions and subjects. We will create multiple "mini's" to find success sooner, and you will build even more confidence with "planned" problems and learning to resolve them. Get ready for a shift and break through some barriers!"
